**Detailed Action**

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

1. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Masunaga et al, U.S. Patent No. 6,909,699.
2. Per claim 1, Masunaga discloses a method of optimizing communication over a high-speed serial bus by minimizing the delay between packets transmitted over the bus, the method comprising:
  - calculating the round trip delay between PHYS connected on the bus by pinging (column 20 lines 32-41),
  - a bus manager sending a configuration packet to all PHYS connected on the bus, the configuration packet containing a minimum gap-count parameter value (column 20 lines 42-47, figure 40) (By saying “thereby optimizing the gap count”, it is understood that the configuration packet was sent to all nodes.);
  - all PHYS connected on the bus sending packets over the bus using the minimum gap-count parameter value as a delay between packets. (column 18 lines 55-65, column 19 lines 1-16) [defines minimum gap-count.], and (column 20 lines 42-47 figure 40)
